

5 Working with archives - Exercises

	Exercise 1
1-1	Login to your system
1-2	Create a directory “collect” in your login directory. hint: use <code>mkdir</code> .
1-3	Copy all files from the <code>/etc/</code> directory to the collect directory. hint: use <code>cp</code>
	In the collect directory create a zipped tarfile of all files in collect. hint: use <code>tar zcf</code>
1-4	Remove all files from the content directory except the tarfile. hint: use <code>rm</code>
1-5	Extract the tarfile to restore all files in the collect directory. hint: use <code>tar xzf</code>
