

Clone existing policy to de-activate and remove current policy.

Clone an existing policy and remove the original after activating the cloned version.

1. Grid Manager
ILM
-> policies
 create policy: policy1
 -> select the default rule
 -> select other rule(s)

2. ILM
-> policy tags
 create tag
 -> mytag
 -> connect to policy1
 -> update assigned policies
 yes
 assign policies
 (now the policy is active)

3. ILM
-> policy policy1 -> clone
 (name=policy1 (v2))
-> select default rule
-> deselect or select other rules
 save
 (policy is still inactive)

4. ILM
-> policy tags
 select policy tag mytag and connect to policy1 (v2)
 update assigned policies
 yes
 assign policies
 (policy is now active)

5. ILM
-> policy1
 remove
