Additional lab Prism Central

1. Login to Prism Central and make sure you have 2 registered clusters.

2. Add an Image from URL http://uadmin.org/mini.iso

3. The image should be placed on both registered clusters.

4. Create a VM. The VM should land on ntnx-2.

   Make sure it will boot from the iso image
   Make sure it has a disk of 10GB
   Make sure it gets connected to the datanetwork on ntnx-2

5. Power on the VM.

   (Do not install the OS).

6. On ntnx-2 try to delete the VM.
   Do you succeed?

7. On ntnx-2 try to delete the Image.
   Do you succeed?
